

Construction of upgrades and improvements to the Two Rivers Water Reclamation Authority's (TRWRA) Riverside Avenue Collection System, located in Oceanport for the amount of \$798,628.65 were financed by the New Jersey Water Bank (NJWB). The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (NJIB) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the NJIB to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide water quality benefits from the elimination of an aging pump station and installation of new functional and reliable gravity sewers for residents and businesses in the Borough of Oceanport.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
